

Sudeep Kumar Surya

Backend Developer · B.Tech Computer Science Engineering Student

PROFILE

Computer Science Engineering student focused on backend development and software engineering. Interested in building practical systems, learning new technologies, and turning ideas into working software. Currently developing skills across Java, Python, databases, web technologies, Git/GitHub, and machine learning.

CAREER TARGET

Target roles: Backend Developer / Software Engineering Intern

Professional direction: build strong backend fundamentals, gain internship experience, and continue growing through real-world software projects.

TECHNICAL SKILLS

Programming	Java, Python, C, C++, PHP
Web	HTML, CSS, JavaScript
Backend / Frameworks	Flask, FastAPI, Java backend technologies
Databases	MySQL, PostgreSQL, DBeaver
Tools	Git, GitHub
Additional Focus	Data Structures & Algorithms, Machine Learning, backend development

FEATURED PROJECT

Hospital Queue Management System

- AI-driven system designed to improve hospital patient queue and appointment management.
- Uses machine learning for consultation-duration and no-show prediction.
- Includes queue optimization, scheduling, forecasting, and explainable AI concepts.
- Technology focus includes Python, Flask, MySQL, Random Forest, ARIMA, and SHAP.

ACHIEVEMENT

External Jury Award — HackNovation 2026

Team ExploreX · GIET University

EDUCATION

B.Tech — Computer Science Engineering	GIET University	2025–2029 · CGPA 8.7
Intermediate	Jawahar Navodaya Vidyalaya, Rayagada	CBSE · 2025 · 80%
Matriculation	Sacred Heart School, Rayagada	ICSE · 2023 · 78%
